See how the features of the new Tech Tub² ® Carts compare

Top priorities: affordable, flexible and mobile

Before selecting a device storage cart, ask yourself these questions:

- How are you managing devices and do you like your current solution?
- Is your current solution easy to move from place to place?
- Do you require high security?
- Do you have one central device sign-out location?
- Do you purchase small sets of devices as budget allows?
- How are you charging your current devices?
- Are your sets shared throughout the school or do they remain in the classroom?

Power timer for charging
(requires only 1 outlet to wall)

Trolley model – holds 10 devices (shown)
Trolley model – holds 6 devices also available

Sturdy locking casters that glide over floor transitions

When considering a charging cart, be sure to compare its features against our Tech Tub² ® line up using the checklist below.
